To Whom It May Concern:

MATT MAY - LETTER OF RECOMMENDATION

I am currently the managing director of FAME Information Services, Inc. Prior to this position, I was president of Muller Data Corporation for 12 years.

I have known Matt for 6 months, since he joined our marketing department last fall as the temporary Marketing Coordinator. FAME sells sophisticated data management solutions. As a result, each customer has specific marketing needs. The marketing department is a vital function in the company because it assists in the sale of the company's goods and services through so many different means, including direct mail and email campaigns, tradeshow, and advertising, to name a few. From the time that Matt joined the department to the time that his temporary assignment was concluded, he was a crucial team member. While his most important contributions were his abilities to collaborate as a team member, his superb organizational skills and time management, along with a keen ability to multitask, his creative thinking "outside of the box", and a friendly, open, humorous attitude and personality.

Because of his strengths, I was able to focus on the areas of importance while Matt handled all aspects of the departmental work, alongside our Marketing Manager. I had every confidence in his ability to handle the department when either myself or the manager was away.

Matt is a pleasant person to work with. I wish him the very best of luck and wish we were able to keep him on as a permanent fixture in our company.

If I can be of any further assistance, please let me know. I may be contact at the above address or at (212) 506-0386.

Regards,

Neil Edelstein
